

Lursoft

for Dynamics 365 Business Central

The Lursoft interface creates a connection between the company's business software and the Lursoft company database, enabling automatic data exchange.

The application is designed for anyone who needs to quickly obtain correct company data for creating and managing customers and vendors in Business Central.

Main features

Quickly add company details to Business Central customer and vendor data:

- Estonia
- Latvia
- Lithuania

Importable data:

- Company name
- Address
- Registration number
- VAT Registration number

The Lursoft interface offers access to the company database, enabling you to easily add or verify the accuracy of your customer and vendor information within the Business Central software.
