

E-mail Enhancements

for Dynamics 365 Business Central

Enhanced Email extends the standard email functionality in Business Central by enabling more flexible and transparent communication through customizable CC/BCC settings and improved visibility of sent messages.

This extension helps users streamline email workflows, ensure consistent delivery of important documents, and gain better control over email recipients—without opening each message individually.

Main features

Adds CC and BCC fields to company data for default email routing

Enables document-specific CC/BCC settings via Report Selection

Displays recipient information directly in the Sent Emails list

Option to automatically attach delivery notes to sales invoice emails

Enhances transparency and reduces manual steps in email handling

Enhanced Email improves communication transparency and efficiency in Business Central by enabling document-based CC/BCC configuration and providing clear visibility into sent email recipients.
