

DocLink Manager

for Dynamics 365 Business Central

DocLink Manager enhances the native document linking capabilities in Business Central by allowing users to attach and manage hyperlinks across a wide range of purchasing and production documents and lists.

Main features

Add hyperlinks to documents such as:

- Purchase orders, invoices, credit memos (posted and unposted)
- Purchase and production document lists
- All stages of production orders (planned, firm planned, released, finished, simulated)

View and manage links from the document factbox pane

Edit or delete links via a simple interface

Default description auto-filled from the link address

This extension simplifies access to external resources, improves documentation traceability, and supports collaboration by enabling users to add, view, and manage links directly from document factboxes.
